Separates, if desired, must be ordered in advance of publication. Separates of leading articles will be printed as ordered, of which 50 (without covers) will be furnished *gratis*, the actual cost of the remainder (and covers, if desired) to be paid for by the author. The table below shows the *approximate* cost of separates consisting of plain text or text with line engravings. The actual cost may vary from the figures given, and will depend upon the amount of work in re-making the pages into forms, press work, paper, binding, etc. Separates containing half-tones may be expected to cost somewhat more than the rates given, the increase depending upon the number of cuts and the amount of work required upon them.

Recent and Announced Books

Dudley and Kellor's Athletic Games in the Education of Women

By GERTRUDE DUDLEY, Director of the Women's Department of Physical Education in the University of Chicago, and FRANCES A. KELLOR. 268 pp. 12mo. $1.25 *net.*

A discussion of the more highly organized games, with more emphasis upon their value as real factors in education, than upon their benefit to the physical well-being of the individual. The games which are considered include basketball, indoor baseball, hockey, lacrosse, and cricket, while some attention is given also to some of the minor games which demand the co-operation of two or more players.

Anderson's History of Common School Education

By L. F. ANDERSON, State Normal School, Marquette, Michigan. xii+308 pp. 12mo. $1.25.

A history of the development of the common or non-professional school with a discussion of its nature and function, and its relation to other institutions, educational and otherwise. The outline of the growth of the science and art of common school education should aid the teacher in working out effective methods of instruction and organization.

New Edition of

Ganong's Laboratory Course in Plant Physiology

By WILLIAM F. GANONG, Professor in Smith College. vi+265 pp. 8vo. $1.75.

This revision retains the feature of the first edition as to use of simplified apparatus, but on the one hand extends it to include even the simplest appliances for school use, and on the other to include the more exact appliances giving definite quantitative results.

In Press

Entirely New Edition of

Remsen's Introduction to the Study of Chemistry

By IRA REMSEN, President of the Johns Hopkins University. (*American Science Series, Briefer Course*) $1.25. (*Ready in May*)

An important feature of this new edition is the expansion of the treatment of the commercial applications of chemistry. Fuller descriptions are given of some of the processes noted in previous editions, and new topics are considered. Advantage has been taken of this revision to develop the previous treatment of the subject of ionization in its several relations, so as to include as much of the latest work in this new field as comes within the scope of a book intended for beginners.

Chamberlin and Salisbury's College Geology

By THOMAS C. CHAMBERLIN and ROLLIN D. SALISBURY, Professors in the University of Chicago. (*American Science Series*) (*Ready in June*)

A one-volume textbook on the lines of the authors' widely known three-volume work. It supplies ample material for the average college course in geology.
